

Guide to uploading work on Showbie

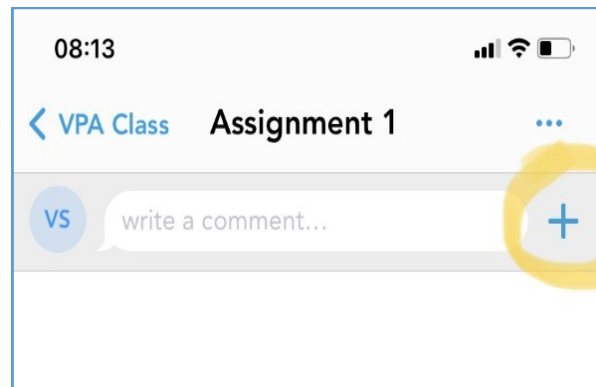

Once you have logged in to Showbie, click on your class.

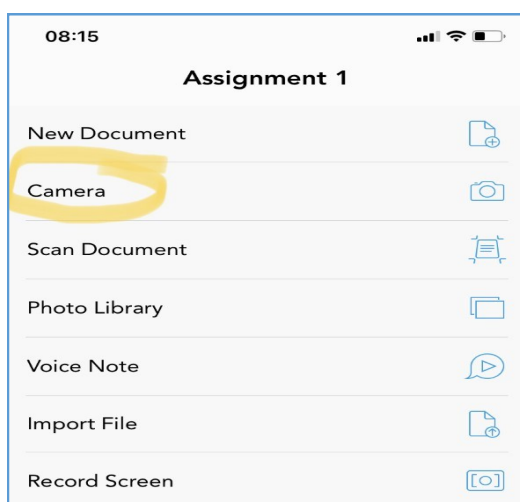

You should then see the assignments that have been set for your teacher that week. Select the assignment that you have completed work for.

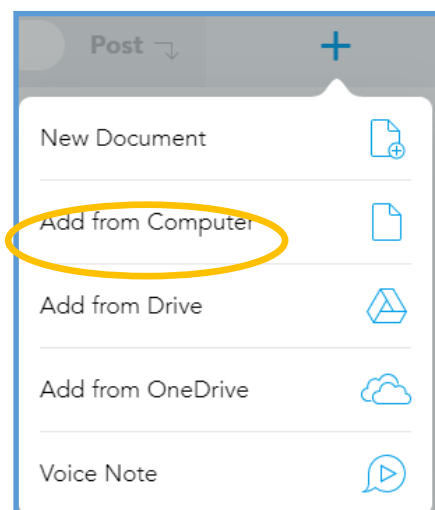

You will then have a bar appear at the top of your screen that will allow you to type a message about your work.

If you click the 'plus' symbol, it will allow you to give you various options to upload your work.

If you are using the app, you will then be able to select the 'camera' option and take a picture of the work you have done!

If you are using the desktop version (from a laptop or computer), you will have the options above.

Selecting 'Add from computer' will allow you to upload the work you have completed, such as powerpoints or word documents.
